

Greetings FOP Members!

Looking for a way to *increase communication* at your lodge? Need a common area to post announcements and lodge news? AgniTEK's content management based websites make it easy to communicate with members of your organization and keep members informed about upcoming meetings and events. Members can also *share pictures* and *post to forums* in their own *Members Only* section. **See what your site could look like by going to [www.MyFOPWebsite.com](http://www.MyFOPWebsite.com).**

AgniTEK uses their own content management system called Blaze in their websites. Blaze makes it easy and convenient to make updates to your website and only requires basic computer knowledge; no programming knowledge necessary. *With packages starting as low as \$199, AgniTEK can setup a dynamic, professional looking website and train you and your staff on how to make updates to your website in the future.* Don't have time to make updates? AgniTEK also offer maintenance packages to assist you in making updates to your website.

Several FOP lodges including the state lodge, use their Blaze website to announce events and promote FOP membership. I would be more than happy to speak with you regarding our website services and demonstrate how easy it can be to make updates to your website. My direct line is 979-260-8324 ex 402 and I can be reached by e-mail at [rjacobson@agnitek.com](mailto:rjacobson@agnitek.com). You can also find out more information about our website services online at [www.blazecms.com](http://www.blazecms.com).

Thanks!

**Becky Jacobson, M.Ed**
